

James Bona-Landry

Email • [LinkedIn](#) • +1 (705) 977-1175 • [GitHub](#) • [Website](#)

EDUCATION

University of Toronto, Toronto, Ontario, CA

- Ph.D. in Mathematics Sep 2025 – Present
 - Research interests: stochastic analysis, KPZ universality, integrable probability
 - Advisor: [Prof. Jeremy Quastel](#)
- M.Sc. in Mathematics Sep 2024 – Nov 2025
 - Thesis: [Stationarity of Brownian Motion for the Open KPZ Equation](#)
 - Advisor: [Prof. Jeremy Quastel](#)
 - Coursework spanning stochastic analysis, PDE, algebraic complexity theory, and deep learning
- B.Sc. (Hons) with High Distinction, Mathematics Specialist Sep 2020 – Jun 2024
 - Cumulative GPA: 3.92 / 4.0
 - Completed graduate coursework requirements of Ph.D. program in addition to undergraduate curriculum

EXPERIENCE

Department of Mathematics, University of Toronto

- Doctoral Researcher Apr 2024 – Present
 - Studying the large-scale asymptotic behaviour of random growth models and interacting particle systems, with a focus on invariant measures, scaling limits, and universality phenomena
- Teaching Assistant Sep 2023 – Present
 - Duties include running tutorials, hosting office hours, grading coursework, and invigilating exams
 - Current Appointments: [MAT244H \(ODEs\)](#), [MAT236H \(Vector Calculus II\)](#), and [MAT235H \(Vector Calculus I\)](#)
 - Past Appointments: [MAT1128H \(Stochastic Differential Equations\)](#), [MAT344H \(Combinatorics\)](#), [MAT292H \(ODEs for Engineers\)](#), [MAT244H \(ODEs\)](#), [MAT235H \(Vector Calculus I\)](#), [MAT136H \(Calculus II\)](#), [MAT135H \(Calculus I\)](#), PUMP I
- Mathematics Student Union Sep 2022 – Apr 2024
 - President (2023-2024): Directed union activities, organized executive meetings, and functioned as the primary liaison between the department and undergraduate student body
 - Vice President of Academics (2022-2023): Organized weekly academic enrichment seminars and student talk series

PREPRINTS & PUBLICATIONS

- [1] James Bona-Landry. *Invariant measures for the open KPZ equation: the Gaussian case*. Submitted to Mathematical Physics, Analysis and Geometry. 2026. arXiv: 2604.23462 [[math.PR](#)]. URL: <https://arxiv.org/abs/2604.23462>

AWARDS & SCHOLARSHIPS

- Mathematics Department Research Award, University of Toronto Apr 2023 – Aug 2023
 - Funded a summer research project under the supervision of [Prof. Jeremy Quastel](#) ([PDF of Write-Up](#))
- NSERC Undergraduate Student Research Award, University of Toronto Apr 2022 – Aug 2022
 - Funded a summer research project under the supervision of [Prof. Marco Gualtieri](#) ([PDF of Write-Up](#))
- University of Toronto Excellence Award Apr 2022
 - Competitive research grant providing undergraduate students with funding for a summer research project under the supervision of a faculty member; declined due to concurrent funding

SKILLS

- **Mathematics:** Probability theory, stochastic calculus, & partial differential equations; additional graduate coursework in deep learning, real & complex analysis, differential topology/geometry, algebra, and combinatorics
- **Computation:** Python (PyTorch, NumPy), numerical & statistical methods, $\LaTeX$

[Last updated 2026-09-18]
